EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin J. Zilka on 06/08/2006.

The application has been amended as follows:

20. (Currently Amended) A computer program product embodied on a computer readable medium for displaying a network browser graphical user interface for storing content in association with a network browser, comprising:

computer code for working in conjunction with a network browser window associated with a network browser for displaying Internet content associated with uniform resource locators (URLs) during network browsing; and

computer code for displaying a plurality of identifiers in a window separate from the window in which the content is displayed;

wherein a user is allowed to pre-select one of the identifiers which is separate from the URLs;

wherein, after the pre-selection, selected content associated with at least one of the URLs displayed during use of the network browser is correlated with the pre-selected identifier in a manner that is dependent on a selection of the pre-selected identifier which is separate from the URLs, and stored;

wherein the identifiers are capable of being manually entered by the user;
wherein any content selected during use of the network browser results in automatic correlation of the content with the manually entered, pre-selected identifier which is separate from the URLs.

Art Unit: 2174

22. (Currently Amended) A system including a computer readable medium, comprising:
means for working in conjunction with a network browser window associated with a network browser for displaying Internet content associated with uniform resource locators (URLs) during network browsing; and

means for displaying a plurality of identifiers adjacent to the window in which the content is displayed;

wherein a user is allowed to pre-select at least one of the identifiers which is different from the URLs;

wherein, after the pre-selection, selected content associated with at least one of the URLs displayed during use of the network browser is correlated with the pre-selected identifier in a manner that is ~~a function of~~ based on the pre-selected identifier which is different from the URLs, and stored;

wherein, after the pre-selection, any content selected during use of the network browser results in automatic correlation of the content with ~~and as a function of~~ the pre-selected identifier which is different from the URLs;

wherein the pre-selected identifier is different from the URLs and is capable of being manually entered by the user.

23. (Currently Amended) A system, comprising:

a computer;

a network browser installed on the computer;

computer code for working in conjunction with a network browser window associated with the network browser for displaying Internet content associated with uniform resource locators (URLs) during network browsing; and

computer code for displaying a plurality of identifiers adjacent to the window in which the content is displayed;

wherein a user is allowed to pre-select at least one of the identifiers which is non-inclusive of any portion of the URLs;

wherein, after the pre-selection, selected content associated with at least one of the URLs displayed during use of the network browser is correlated with the pre-selected identifier as

Art Unit: 2174

~~function of~~ based on the selection of the pre-selected identifier which is non-inclusive of any portion of the URLs, and stored;

wherein, after the pre-selection, any content selected during use of the network browser results in automatic correlation of the content with the pre-selected identifier in a manner that is based on the pre-selected identifier which is non-inclusive of any portion of the URLs;

wherein the pre-selected identifier is capable of being manually entered by the user manually adding to the plurality of identifiers utilizing an icon adapted for adding to the plurality of identifiers which are non-inclusive of any portion of the URLs.

24. (Currently Amended) A computer program product embodied on a computer readable medium for displaying a network browser graphical user interface for archiving content in association with a network browser, comprising:

computer code for working in conjunction with a network browser window associated with a network browser for displaying content associated with uniform resource locators (URLs) during network browsing; and

computer code for displaying a plurality of buckets adjacent to and separate from the window in which the content is displayed;

wherein a user is allowed to pre-select an identifier associated with one of a plurality of buckets;

wherein, after the pre-selection and upon selection, selected content associated with multiple URL's displayed during use of the network browser is correlated with the pre-selected identifier in a manner that is based on a selection of the pre-selected identifier which is different from the URLs and is capable of being manually added by the user, for being stored in user computer memory;

wherein the user is allowed to subsequently access the content utilizing the identifier;

wherein a date is stored with the content;

wherein any content selected during use of the network browser results in automatic correlation with the pre-selected identifier which is different from the URLs and is capable of being manually added by the user;

Art Unit: 2174

wherein the identifiers are different from the URLs and are capable of being manually added by the user.

Allowable Subject Matter

Claims 1-18, and 20-41 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art either alone or in combination doesn't teach the limitation of a user is allowed to pre-select one of the identifiers which is non-inclusive of any portion of the URLs; and wherein, after the pre-selection, selected content associated with at least one of the URLs displayed during use of the network browser is correlated with the pre-selected identifier in a manner that is dependent on a selection of the pre-selected identifier which is non-inclusive of any portion of the URLs, and stored in combination with the other claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
